For Your Body

Cavi-Lipo

Cavi-Lipo is one of the most advanced and efficient systems to breakdown fat cells with the use of Ultrasound Cavitation.

This treatment is great for men and women who want to reduce fat deposits on the belly, thighs, hips, breasts, upper arms, double chin or any other troubled areas. The released fats are then metabolized through the liver and other natural means. No pain or downtime.

Results are usually evident within the first treatment but for best results it is recommended to apply the following series of sessions.

Session 1: Bio Frequency

This is a very important treatment for the regulation of the metabolism. Together with a Fit Body Wrap session, infrared heat is generated to the body. It penetrates 1-2 inches deep, warming areas where fats and toxins have been stored, without generating discomfort on the surface of the skin.

As many fats and toxins are soluble at temperatures of just over 100 degrees, these fats and toxins, including cholesterol, heavy metals and acids, can be dissolved and excreted through our sweat or kidneys.

Session 2: Cavitation + Radiofrequency (RF)

This energy treatment is a new and promising technology. A non-surgical rejuvenating treatment for body contouring, fat and cellulite reduction.

Session 3: Electrotherapy + Cavitation

Includes consultation with a gym trainer for personalized exercises and a healthy Green Bar.

Brazilian Butt Lift/ Delphine Cups

Raises, enlarges and reaffirms the gluteus without surgeries. Increases the skin flexibility, releases the Venous and Lymphatic flow and exfoliates the Epidermis for a softer skin. Stimulates Dermis and Hypodermis, decreases muscle tension and lifts the buttocks.

A new and promising technology allows for a non-surgical rejuvenating treatment. Provides body contouring, fat and cellulite reduction. This electro therapy treatment uses different frequencies, levels and polarity to improve blood circulation and tissue nutrition.

No side effects or downtime.

For maximum results, we recommend this treatment to be applied in a series of 3 sessions.

Includes consultation with a gym trainer for personalized exercises and a healthy Green Bar.

Each session has an approximate duration of 70 minutes.
